CIVIL, CONCRETE & UNDERGROUND SUPPORT FOR ELECTRICAL CONTRACTORS

ONE TEAM. MULTIPLE CAPABILITIES.

From underground electrical infrastructure to equipment foundations and site restoration, Pennington provides the field crews, equipment, and experience to support electrical contractors on complex commercial, industrial, institutional, and infrastructure projects.

OUR CAPABILITIES

EXCAVATION

- Electrical duct bank trenching and backfill
- Transformer and switchgear pad preparation
- Excavation for underground vaults and structures

UNDERGROUND INFRASTRUCTURE

- Underground utility installation and support
- Trenching for electrical conduit and duct banks
- Installation of vaults and manholes

CONCRETE CONSTRUCTION

- Transformer and equipment pads
- Generator and switchgear foundations
- Concrete encasement for electrical duct banks

BUILT TO SUPPORT YOUR PROJECT

We understand the coordination required on large construction projects, where electrical, mechanical, civil, and structural scopes overlap.

RELEVANT PROJECT EXPERIENCE

Supporting DSI Mechanical as a third-tier subcontractor on the Children's Hospital project in Richardson/Dallas under McCarthy/Vaughn.

FEATURED PROJECT EXPERIENCE

PROJECT 01

Southwest Airlines Headquarters
Dallas, TX · **GC:** McCarthy

PROJECT 02

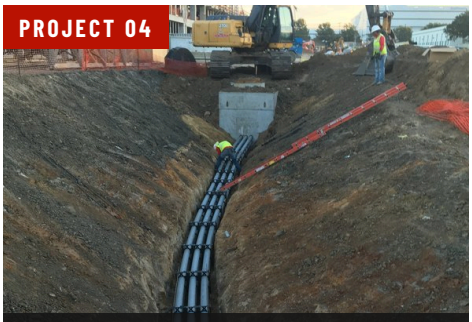

Harry Hines Pedestrian Bridge
Dallas, TX · **GC:** Oncor

PROJECT 03

American Airlines Cayenne Kitchen
DFW Airport · **GC:** DFW Direct

PROJECT 04

Passport Park
DFW Airport · **GC:** Oncor

PROJECT 05

UT Arlington School of Science & Engineering
Arlington, TX · **GC:** Hunt/AECOM

PROJECT 06

YOUR PROJECT NEXT

Duct banks, vaults, equipment pads, and site work. Let's talk about your scope.

OUR EQUIPMENT & FIELD RESOURCES

85	16	12	3	7	24	11
Excavators	Wheel Loaders	Dozers & Track Loaders	Articulated Haul Trucks	Haul Trucks	Compactors	Water Trucks

IN-HOUSE MECHANICS. MINIMAL DOWNTIME.

Equipment breaks down on every job site. What matters is how fast it gets back to work. Pennington employs its own mechanics and keeps every machine on a scheduled preventive maintenance program, so problems get caught in our shop, not on your schedule. When something does go down in the field, our team responds directly. No waiting on a rental yard or outside repair shop.

- ✓ **In-house mechanics and field service trucks**
- ✓ **Scheduled preventive maintenance on every machine**
- ✓ **Fast in-field repair response to keep crews working**

LET'S WORK TOGETHER
